

The Love Letter Campaign

november 11, 2011 - february 14, 2012

heroes, families, and their love stories

join the campaign at www.familyofavet.com

If you love a hero, please join us in celebrating your love story... all of our love stories... stories that endure despite PTSD (post-traumatic stress disorder), TBI (traumatic brain injury), and the other challenges that attempt to defeat us in life after combat. Share the story of where you and your veteran started... and the many moments since... the times (good and bad) that have written the pages of your life with a hero. Help us tell the world the rest of our stories - the stories of lives lived *together* with the visible and invisible wounds of the battlefield. If you are part of the life of a hero in any way, help us celebrate our lives of love *despite* and *because of* the challenges we now face!
